

CYSTIC FIBROSIS

Study	Title	Description	Link to ClinicalTrials.Gov
CLAM320B2002M	Multiple Patient Program for Lamprene (Clofazimine) for the Treatment of Non-TB Mycobacterial Infections	An expanded access of Lamprene (Clofazimine) to patients with Cystic Fibrosis patients with Mycobacterium infections	
EDP-938-201	A Study to Evaluate EDP 938 Regimens in Infants With RSV (RSVPEDs)	A 2-part study to evaluate the safety, pharmacokinetics and efficacy of EDP-938 in infants with RSV infection. This is a randomized, double-blind, dose ranging, placebo-controlled study in respiratory syncytial virus (RSV) among hospitalized and non-hospitalized children aged from 28 days to 24 months, assessing the safety, tolerability, pharmacokinetics, clinical outcome and antiviral activity of a 5 day treatment with EDP-938.	https://clinicaltrials.gov/ct2/show/NC/T04816721?term=edp-938-201&draw=2&rank=1
